\* There is controversy about this summit. Several mountaineers in Chile think that Oyarzún and Lucero did not reach the main summit. There is no conclusive proof (the pictures are blur). The polemics increased after the declarations of Reinhold Messner to El Mercurio, saying that the Chileans did not summit. While new investigations are being done, the records of Lucero & Oyarzún remain on the table. Oyarzún, contacted by the author, refused to give details and used evasive answers, increasing the doubts.
